

Vaccines for Children Program

Pediatric Health Associates is enrolled with the Illinois Vaccine for Children Program so that we can offer vaccines at a reduced rate to eligible children. Your child/children qualify for immunizations through the Vaccines for Children (VFC) program if he/she meets the following criteria:

- He/she is currently enrolled in All Kids
- He/she does NOT have health insurance
- He/she is an American Indian or Alaskan Native
- He/she is underinsured** (**PLEASE NOTE:** Underinsured children can only receive VFC through a Federally Qualified Health Clinic or Rural Health Clinic). PHA is not allowed to administer vaccines for underinsured patients.
- He/she is between the ages of 0-18 years

You will be required to sign a patient eligibility screening record for each child, verifying that you are eligible due to at least one of the criteria stated above. If you have not signed the waiver for each child, you are not enrolled in the program!

Only children that meet one of the eligibility requirements above may participate in this program.

The cost **per** vaccine will be \$10.00.* Payment for the shots is due the day you receive the immunization. No immunizations will be given without payment. *AllKids patients do not have to pay the vaccine fee as it is covered by the AllKids program.

Pediatric Health Associates hopes that by offering this program, all children will become vaccinated to stay healthy and protected against disease outbreaks.
